Programme 1

Aim

To design and develop a simple static HTML web page for an Online Internship Information Portal that displays and maintains internship and student record information using ordered lists, unordered lists and tables.

Algorithm / Steps

1. Start the program.
2. Open a text editor (VS Code/Notepad).
3. Create a new .html file.
4. Define the HTML structure with <!DOCTYPE html>, <html>, <head>, and <body>.
5. Add a title and heading for the portal.
6. Use an unordered list to show internship details.
7. Use an ordered list to show application steps.
8. Create a table to display student records.
9. Apply CSS for background, colors, and styling.
10. Save and run the file in a browser.
11. Stop the program.

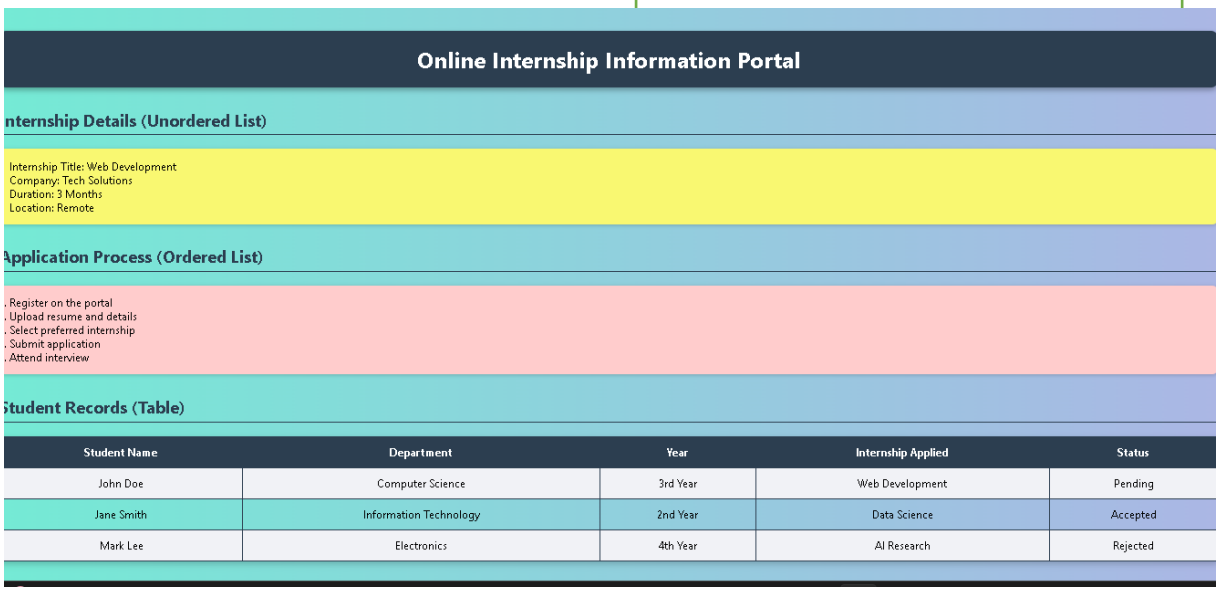
OUTPUT:



Online Internship Information Portal

nternship Details (Unordered List)

Internship Title: Web Development
Company: Tech Solutions
Duration: 3 Months
Location: Remote

Application Process (Ordered List)

. Register on the portal
. Upload resume and details
. Select preferred internship
. Submit application
. Attend interview

tudent Records (Table)

Student Name	Department	Year	Internship Applied	Status
John Doe	Computer Science	3rd Year	Web Development	Pending
Jane Smith	Information Technology	2nd Year	Data Science	Accepted
Mark Lee	Electronics	4th Year	AI Research	Rejected

RESULT :

The output displays a simple static HTML webpage for an Online Internship Information Portal with a structured table presents student records clearly, fulfilling the aim of maintaining internship and student information using ordered lists, unordered lists, and tables.

Programme 2

Aim

To design and develop static web pages for an **Online Internship Information Portal** HTML, Including:

- Home page with three frames
- Login page
- Catalogue page displaying available internships in a table
- Registration page for new users

Algorithm

1. Start the program.
2. Create the Home Page using HTML.
3. Divide the Home Page into three frames:
4. Header frame
5. Navigation frame

6. Content frame
7. Add navigation links in the Home Page to:
8. Login Page
9. Catalogue Page
10. Registration Page
11. Design the Login Page using an HTML form with username and password fields.
12. Design the Catalogue Page using an HTML table to display available internships with details such as title, company, duration, and location.
13. Design the Registration Page using an HTML form to collect user details like name, email, password, gender, and address.
14. Link all pages properly using anchor (<a>) tags.
15. Save all HTML files and test them in a web browser.
16. Stop the program.

Programme 3

Aim

To design and develop an HTML web page using anchor (<a>) tags and an iframe to display linked content within the same page, where the iframe loads a web page containing an image using the <img> tag for the Online Internship Information Portal.

Algorithm / Steps

1. Create a main HTML page with a heading for the Online Internship Information Portal.
2. Add anchor (<a>) tags to link different sections like internship details, application process, and student records.
3. Insert an iframe (<iframe>) to display linked content within the same page.
4. Design a separate HTML page (imagepage.html) containing an internship-related image using the <img> tag.
5. Ensure the anchor links load the image page inside the iframe for a professional, colorful output.

Aim

To design and develop an HTML web page containing a submission form for an Online Internship Information Portal, where students can enter details such as Name, Email, Branch, Gender, and Address using appropriate HTML form elements.

Algorithm / Steps

1. Create a new HTML file named internship_form.html.
2. Build the basic HTML structure with <!DOCTYPE html>, <html>, <head>, and <body>.
3. Add a heading and create a form using the <form> tag with action and method attributes.
4. Insert input fields for Name, Email, Branch (dropdown), Gender (radio buttons), and Address (textarea).
5. Add Submit and Reset buttons, save the file, and run it in a browser to verify functionality.

Programme 5

Aim

To design and develop a web page for an Online Internship Information Portal that embeds a map and provides hot spots, frames, and hyperlinks to navigate and display related internship content.

Algorithm / Steps

1. Create the main page (index.html) with frames for navigation and content display.
2. Add navigation links using anchor (<a>) tags to load pages into the content frame.
3. Embed a map in map.html using an image with defined hot spots (<map> and <area> tags).
4. Link hot spots to content.html so that clicking on regions loads related internship information.
5. Save all files and run index.html in a browser to verify navigation, frames, and hot spot functionality.
